

March 18 Class 3 -Pastels. 12 X 16 inches on Art Spectrum Colourfix Coated Sand color. I will add blooming waterlilies to the still pond to make it more interesting and interrupt the vertical reflections in the still water.

You can draw your outline using the grid option on page 1 or printout the template and transfer it by tracing. The image above will not print out the full size. It is only functional for hand drawing. To print out the 4 sheet template:

[Download 4 full sheet size printable template](#) << **Right click on this link and select, "Save Link as" Then open it from your hard drive.**

Do not try to print the template from your browser. You need Adobe Acrobat Reader to execute the "poster" print option.

<https://acrobat.adobe.com/us/en/products/pdf-reader.html?promoid=KSSEX>

If you print it, change the setting to "poster" under Page Sizing and Handling in The PDF program after clicking on "Print". It will print the image out exactly in proportion using 4 sheets of paper. To transfer the image onto your canvas or paper, you can place transfer paper under the printer drawing once you have taped the 4 sections together. Because of the printer margin, you may have to trim off a thin portion at all four sides of each section. Some printers allow you to change the border setting to zero. If you are doing a watercolor, do not use transfer paper. It is impossible to erase the drawing. Instead, spread dark gray pastel on back of the 4 sections and use that as carbon paper.
